The LSE2I laboratory within the National School of Applied Sciences Oujda (ENSAO) of Mohammed First University, organizes an international workshop on the theme of "Robotics, Artificial Intelligence and their Applications" [RAIA'19], which will be held at Be Live Collection Hotel in the wonderful Moroccan "Blue pearl" city of Saïdia, from 26 to 28 September 2019. This workshop will discuss the results of research in robotics and artificial intelligence and their applications. Especially Deep Learning, the Internet of Things (IoT), virtual reality, augmented reality, serious games, drones, home automation...

Through presentations and exchanges, the day's objectives are to allow academic and industrial worlds to share scientific and technical elements and to discuss the technical challenges inherent to the widespread deployment of robots and their applications in the coming years. Major players from the world of research and industry will share their experiences and projects in these areas.
